14th SEASON

Descriptive List of

GLADIOLUS

The Cream of the

NOVELTIES

and the Best of the

OLDER VARIETIES

ARTHUR A. ARENIUS

59 Bliss Road

LONGMEADOW, MASS.

FOREWORD

This is my fourteenth year and this list is presented with my appreciation for your patronage which has enabled me to increase my business each year. This season my planting covered about ten acres. The midsummer drouth affected the blooms somewhat, but the fall rains were beneficial to the bulb growth and I have harvested a very fine crop of bulbs. You will note

that several varieties have been dropped from the list and newer varieties added. This is in keeping with my policy of discarding a variety as soon as something better comes along to take its place. Outstanding glads in my garden this past season were the following: Adirondack, huge rose with blotch; Allegro, fine
(Continued on back page)

THREE NEW ARENIUS ORIGINATIONS FOR 1937

Coral Cluster According to Ridgeways, a clear coral red with small deeper lines in the throat. A decorative variety, practically a self color, with 5 or 6 open. Spikes always straight and the perfectly placed bloom has exceptional keeping qualities. Midseason and medium increase. Bulbs always healthy. I have a fair stock, so price is reasonable.

	Large	Medium	Small	Bulblets
1	1.00	.75	.50	.10
10	8.00	6.00	4.00	.80
100	...	18.00	32.00	6.10
1000	50.00

Lavender Queen According to Ridgeways, a violet lavender. Usually of a clear color. Spike tall and vigorous, always straight and large blooms perfectly placed. Good propagator. Midseason. I consider this my best lavender. Have a fair stock so can offer it at a reasonable introductory price.

	Large	Medium	Small	Bulblets
1	2.00	1.50	1.00	.20
10	16.00	12.00	8.00	1.60
100	...	96.00	64.00	12.80
1000	100.00

Scarlet Glow The brightest and clearest colored scarlet I have seen. Very tall with large blooms. Stock limited. Medium propagator.

	Large	Medium	Small	Bulblets
1	10.00	7.50	5.00	1.00
10	...	60.00	40.00	8.00
100	60.00

Above Varieties:

	Large	Medium	Small	Bulblets
1 each	12.00	8.50	6.00	1.20
3 each	30.00	22.00	15.00	3.00
10 each	...	55.00	40.00	8.00
100 each	65.00

LAVENDER QUEEN

INDEX TO ORIGINATORS: (A) Austin; (Aust.) Australian; (C) Coleman; (D) Dierper; (Dec.) Decorah; (EL) Ellis; (K.) Kunderd; (P.) Pfitzer; (SAL) Salbach.

Priced per 100 at 8 times the 10 rate. Single rate at one-tenth of 10 rate. No single item less than 10 cents.

	Large	Medium	Small	Bulblets

Queen Helen 2nd (SAL) pink with yellow throat	10	.75	.50	.25
Queen Louise (P.) white, many open	10	.60	.40	.20
Radiance (Arenius) clear deep red of a bright carmine shade. You'll like it	10	.50	.30	.15
Rapture (Palmer) tall late pink	10	.50	.30	.15
Raquel (Nitchman) cream	1	5.00	3.00	1.75
Red Lory (Aust.) red, many open	10	.60	.40	.20
Red Ruffles (Arenius) orange red, with extremely ruffled blooms, opening 8, wide open form, straight spike, midseason. Unlike most ruffled varieties this has a long flower spike of 20 buds and many showing color	10	5.00	3.00	1.50
Redwood Beauty (Majeski) improved Our Selection	1	1.20	.75	.50
Retah Schell (Kaylor) pink	1	.5010
Robert Burns (Christ) large deep blue	1	25.00	...	1.50
Robert The 1st (Wilks) pale rose-purple with deeper blotch	1	.50	.35	.20
Rosemarie Pfitzer (P.) white, tinted pink	10	2.50	2.00	1.50
Rudolph Zirklin (P.) new paisy blue	1	1.00	.75	.50
Salbach's Orchid (SAL) pink orchid shade, fine	10	.50	.30	.15
Scarlet Princes (C.) the standard scarlet	10	.40	.20	.10
Schwaben Girl (P.) early fine pure pink	10	.80	.50	.30
Seastar (P.) field pink, clear color	10	.60	.30	.15
Senorita (SAL) slow red and orange	10	.50	.30	.15
Sir Galahad (Stevens) new smoky	1	.5010
Smiling Maestro (Christ) large orange salmon, many open	10	2.00	1.50	1.00
Snowbound (Ashburn) new white, very large	1	2.00	1.50	1.00
Solveig (Dec.) ruffled white, small pink blotch	10	3.00	2.00	1.00
Sonatina (P.) rose with small red blotch	10	1.00	1.00	.50
Southern Cross (Aust.) fine clear red	10	1.00	.75	.50
St. Lawrence (Christ) brilliant scarlet with deeper blotch	1	1.00	.60	.30
Sunnyside (Aust.) cerise pink with cream throat, many open	1	.30	.20	.10
Sunset Cloud (Kaylor) beautiful pink	1	.2010
Sweet Lavender (C.) early lavender	10	.40	.20	.10
Star of Bethlehem (P.) fine new white. An improvement on Maid of Orleans	10	2.00	1.20	.80
Takina (Burns) very large roseline purple, not a clear color	150	.10
The Bounty (Nitchman) large red	1	8.00	5.00	3.00
Tip Top (P.) new red, very large and fine	10	2.00	1.50	1.00
Trevonian (Horn) rose pink	10	.80	.60	.40
Wasaga (Palmer) beautiful buff, extra	10	.60	.40	.20
Wurtembergia (P.) large red, cream throat	10	.70	.40	.25
Yellow Emperor (EL) clear deep yellow	10	1.20	.80	.40
Yvonne (EL) flesh color, pink blotch	10	.50	.30	.15
Zauberflote (P.) peach rose with red blotch. Looks very promising as a commercial	1	1.00	.70	.30

SPECIAL COLLECTION OF ASSORTED GLADS

Many folks desire a few "glads" to plant in the garden and do not care to fuss with the numerous varieties just now in the market for cut flowers. For this purpose I am offering a special collection of assorted named varieties but not labeled. Of course, if you have a preference or dislike for certain colors, just mention it and I'll act accordingly. If after blooming time you are not satisfied and pleased in every way, the purchase price will be refunded and no questions asked. Cultural directions accompany each order.

200 bulbs	\$5.00	50 bulbs	\$1.75
100 bulbs	2.00	25 bulbs	.80

Medium sized bulbs of above for half price. Why not send in your order now before you forget? Will hold and ship any time you say.

Quantity Prices F. O. B. Springfield, Mass.

PRICED PER 100, 25 bulbs at 100 rate, 500 bulblets at 1,000 rate or one pint at quart rate. Those marked with * (asterisk) can be supplied per 1,000 at 8 times 100 rate. 250 at 1,000 rate. No. 5 and No. 6 and Bulblets Prepaid.

light blue with many open; Allemania, very tall bright red; Blue Schönheit, fine medium blue; Dr. Bennett—do you know of any red that will beat it? Isola Bella, Pfitzer's new lavender with many open and nearly all of the buds showing color; J. S. Bach, salmon rose with ten or more open, also early; Maid of Orleans, fine creamy white; Max Reger, striking blue; Mrs. T. E. Langford, beautiful peaches and cream; Mr. Wm. Cuthbertson, pink with deeper edgings; Ninth Symphony, beautiful clear salmon-red with sheen; Oeganda, absolutely the darkest colored glad I have ever seen; Phyllis McQuiston, beautiful pink; Picardy, right in the front row in anybody's collection; Queen Helen 2nd, good commercial pink; Rosemarie Pfitzer, cream white with many open; Star of Bethlehem, the best white that I have seen; Tip Top, good looking red, very large blooms; Zauberflote, a very promising commercial, blotched variety.

Ordering: Terms—cash with order, or a 25% deposit if future delivery is desired, balance C. O. D. Delivery charges prepaid on orders of \$1.00 or more. If less, add 15c toward shipping cost. No orders taken for bulbets after April 1st, planting sizes after May 1st, and for large bulbs after June 1st. Can furnish mixtures until July 1st. No single item less than 10c. We ship anytime.

With every order that goes out we send a circular which gives you all the necessary information for growing glads.

When your bulbs arrive do not leave them in the package for a long time, but open them up at once and give the bulbs air. They must have air in storage. If they arrive in very cold weather, it is all right to put them in a cool place for a day or two before opening. The idea being that if there is any frost in them that by thawing out slowly they will be all right. However, we pack very warm and try to have them reach you in good condition.

Though glads will give a fair account of themselves under most impossible conditions, it will pay you to grow them as well as possible. They will be so much better and give you much more pleasure if conditions are right. In very dry weather give them plenty of water.

It is generally recommended to grow gladiolus on different soil each year. Most of the growers try to do this. But I know it is impossible for many amateurs to change soil as their garden plot is limited and it is necessary for them to grow on the same place every year. This need not prevent anyone from growing good gladiolus. I know of people who have grown glads on the same place for many years and they are still perfectly healthy and free from disease and produce good blooms every year.

If it is necessary to grow in the same place every year, I would suggest the following procedure: Plant your bulbs from four to six inches deep and after placing them in the hole or trench, cover them with an inch or two of soil, then using a watering can drench the ground thoroughly over the bulbs with Bichloride of Mercury solution using a somewhat weaker solution than you would use in disinfecting the bulbs. For disinfecting we recommend a 1-1000 solution or one ounce to seven or eight gallons of water. For soaking the ground would recommend about one ounce to twelve or fifteen gallons of water. I know of one

grower who some years ago had some disease in his garden but this past season there wasn't a diseased plant on his place and the growth was unusually strong.

After soaking the soil, finish covering.

Gladiolus Thrips: Most persons who are very familiar with glads, now have very definite information regarding control, but there are still vast numbers of people who are entirely unfamiliar with proper methods of treatment and control. For smaller lots of bulbs, Napthalene Flakes is perhaps the best and most efficient treatment. Use about one ounce to approximately 100 bulbs and no harm will result if you increase the amount to a moderate degree. Keep the bulbs in a temperature near 70° F. while fumigating. Place bulbs in paper bags that you can tie shut, or in tight wood or paper boxes, but not in metal that would cause sweating and moisture and so cause damage. Let the bulbs fumigate for two weeks, then remove them from the flakes and place them in a cool dry airy place that is also frostproof. Most growers and amateurs dip bulbs before planting, as a measure for control for "scab" and other bulb diseases. If you use (Bichloride of Mercury) Corrossive Sublimate, one ounce to eight gallons of water and immerse bulbs eight or ten hours in this solution, it will prove a double purpose dip, as it is also regarded highly as one of the best methods of destroying thrips or eggs on bulbs. As the C-S dissolves slowly, it is best to mix your solution a day before or use hot water and use the batch twice only, then make an entirely new lot, never use in metal containers, or bring metal in contact with the solution. Wooden pails, tubs or barrels are best. Bulbs can be placed in cloth or burlap bags. Just another caution about Napthalene, never plant any of the material with your bulbs, as it seems harmful, and never fumigate so late in spring that the sprouts or rootlets have started, as it may damage them. Use when the bulb is dry and dormant.

Where you can maintain storage temperature at 40-45 F. or lower for several months, you automatically destroy all thrips and eggs, as the normal life cycle of the insect is about 30 days. Thrips do not breed when the temperature is below 45 F. Very few persons can maintain storage conditions so cold and they are not necessary for good results. It is not difficult to remove all thrips and eggs from your bulbs by proper fumigation or disinfection. The real menace from thrips is not on your own bulbs which are not difficult to keep free, but the greatest source of all infestation is from the people who pay no attention to this problem. Tell your neighbors about control measures.

The following paragraph describing the various stages of gladiolus growing from the pen of Elmer Gove, strikes me as being a "Classic." Are you still a "Freshman" or have you graduated and perhaps taking a "Post Graduate" course?

"There is a fascination about growing glads that becomes a hobby, then a craze. There are five stages of interest in growing "glads." First you just grow them as an amateur, same as you would any other flower. Then as your interest in them increases you become a "fan," then a "bug," then a "nut," then finally a "fiend." When you reach this final stage you are hopeless. You think of "glads" all day, dream of them at night, spend every available minute of your time in the garden, talk of them, visit the shows, read all the catalogs and spend all your money on them. You will look lovingly at the last flower in the fall, will handle over your bulbs in the winter time and will hardly be able to wait till you can lovingly plant the bulbs in the spring. From then till the first bloom appears is a period of happy anticipation. When finally the spikes of bloom begin to appear you are in heaven."
